👤 PROFILE

Web designer with a passion for creating user-friendly, responsive websites. Proficient in HTML, CSS, and JavaScript, I have built several web pages and sites that focus on delivering seamless user experiences across various devices.

💡 SKILLS

HTML

CSS

Javascript

Responsive Design

Bootstrap

Github

Wrodpress (basic)

PSD to HTML

🎓 EDUCATION

Bachelor of Computer Application

Saurashtra University

06/2015 – 03/2018 | Junagadh

📁 PROJECTS

My Portfolio

In this project, I used my knowledge of HTML, CSS, and JavaScript to create a detailed showcase of my personal work and experience. showing my skills in creating responsive and efficient web pages.

Custom Code

In this project, I used HTML, CSS, and some JavaScript to build my very first webpage. I created everything from scratch, writing all the code by hand, which allowed me to fully understand how each part of the page works. I put extra effort into making the design look good and ensuring that the page is responsive, meaning it looks great and works smoothly on different devices.

Bootstrap

In this project, I worked with Bootstrap to create my very first webpage using this framework. It was an exciting experience for me as I explored how Bootstrap helps in building well-structured web pages more efficiently.

Wordpress

In this project, I used WordPress to build a website with a dynamic header and footer, which means these parts can be updated easily across the whole site. I also worked with Gutenberg core blocks, like the column block and media text block, to create and organize the page layouts. This is also responsive, meaning it looks and works well on different devices.
